Volume contents

Number 1 July 1992

1 *S. A. Harris and R. Ingram*
Molecular systematics of the genus *Senecio* L. I: Hybridization in a British polyploid complex

11 *D. J. Coates and R. E. S. Sokolowski*
The mating system and patterns of genetic variation in *Banksia cuneata* A. S. George (Proteaceae)

21 *C. Ferris, R. S. Callow and A. J. Gray*
Mixed first and second division restitution in male meiosis of *Hierochlöe odorata* (L.) Beauv (Holy Grass)

32 *M. Philipp, H. E. S. Madsen and H. R. Siegismund*
Gene flow and population structure in *Armeria maritima*

43 *M. A. Garrido-Ramos, M. Jamilena, R. Lozano, C. Ruiz Rejón and M. Ruiz Rejón*
A cytogenetical and molecular analysis of the ribosomal cistrons of *Allium sphaerocephalon* L. (Liliaceae)

50 *L. B. Salvador and O. Moreira-Filho*
B chromosomes in *Astyanax scabripinnis* (Pisces, Characidae)

57 *M. El Agoze, F. Lemeunier and G. Periquet*
Mitotic and salivary gland chromosome analyses in the *Musca domestica* L. (house fly) (Diptera: Muscidae)

65 *B. Baur and A. Baur*
Reduced reproductive compatibility in *Arianta arbustorum* (Gastropoda) from distant populations

73 *J. Conner and S. Via*
Natural selection on body size in *Tribolium:* possible genetic constraints on adaptive evolution

84 *G. D. D. Hurst, M. E. N. Majerus and L. E. Walker*
Cytoplasmic male killing elements in *Adalia bipunctata* (Linnaeus) (Coleoptera: Coccinellidae)

92 *R. C. Jansen*
On the selection for specific genes in doubled haploids

96 Book review

Number 2 August 1992

97 *J. Brookfield*
The effect of population subdivision on estimates of the likelihood ratio in the criminal cases using single-locus DNA probes

101 *A. R. Malacrida, C. R. Guglielmino, G. Gasperi, L. Baruffi and R. Milani*
Spatial and temporal differentiation in colonizing populations of *Ceratitis capitata*

112 *S. A. Harris and R. Ingram*
Molecular systematics of the genus *Senecio* L. II. The origin of *S. vulgaris* L.

122 *T. A. Markow and J. P. Ricker*
Male size, developmental stability and mating success in natural populations of three *Drosophila* species

128 *R. C. Medina*
Some exact conditional tests for the multiplicative model to explain genotype – environment interaction

133 *D. R. Govindaraju and C. A. Cullis*
Ribosomal DNA variation among populations of a *Pinus rigida* Mill. (pitch pine) ecosystem: I. Distribution of copy numbers

141 *F. K. Kasule*
A quantitative genetic analysis of reproductive allocation in the cotton stainer bug *Dysdercus fasciatus*

150 *D. J. Colgan*
Interspecific isozymic substitution is not random

160 *I. P. King, K. A. Purdie, T. E. Miller, C. N. Law and W. J. Rogers*
Exploitation of chromosome $4S^{l}$, from *Aegilops sharonensis*, for the production of stable 44-chromosome wheat lines

166 *H. S. Pooni, I. Kumar and G. S. Khush*
A comprehensive model for disomically inherited metrical traits expressed in triploid tissues

175 *T. A. Ranker*
Genetic diversity, mating systems, and interpopulational gene flow in neotropical *Hemionitis palmata* L. (Adiantaceae)

184 *L. M. Cook*
The neutral assumption and maintenance of colour morph frequency in mangrove snails

190 *M. Woodwark, D. O. F. Skibinski and R. D. Ward*

A study of interlocus allozyme heterozygosity correlations: implications for neutral theory

199 Book reviews

Number 3 September 1992

201 *D. W. Zeh, J. A. Zeh, M. A. Coffroth and E. Bermingham*
Population-specific DNA fingerprints in a neotropical pseudoscorpion (*Cordylochernes scorpioides*)

209 *A. S. Gilburn, S. P. Foster and T. H. Day*
Female mating preference for large size in *Coelopa frigida* (seaweed fly)

217 *L. E. Equiarte, N. Perez-Nasser and D. Piñero*
Genetic structure, outcrossing rate and heterosis in *Astrocaryum mexicanum* (tropical palm): implications for evolution and conservation

229 *A. E. Houde*
Sex-linked heritability of a sexually selected character in a natural population of *Poecilia reticulata* (Pisces: Poeciliidae) (guppies)

236 *Z. W. Luo and M. J. Kearsey*
Interval mapping of quantitative trait loci in an F_2 population

243 *J. H. Wetton, D. T. Parkin and R. E. Carter*
The use of genetic markers for parentage analysis in *Passer domesticus* (House Sparrows)

255 *K. Wilson and A. G. Gatehouse*
Migration and genetics of pre-reproductive period in the moth, *Spodoptera exempta* (African armyworm)

263 *A. Kumar and J. P. Gupta*
Concentration of chromosomal aberrations on chromosome 3 of *Drosophila nasuta*

268 *P. M. Mirol and C. J. Bidau*
Proximal chiasmata induce non-disjunctional orientation of Robertsonian trivalents in a grasshopper

279 *M. J. Stanhope, B. J. Leighton and B. Hartwick*
Polygenic control of habitat preference and its possible role in sympatric population subdivision of an estuarine crustacean

289 *C. Damgaard and V. Loeschcke*
Partial selfing as an optimal mating strategy

296 Book review

Number 4 October 1992

297 *N. Osawa and T. Nishida*
Seasonal variation in elytral colour polymorphism in *Harmonia axyridis* (the ladybird beetle): the role of non-random mating

308 *O. Savolaninen, K. Kärkkäinen and H. Kuittinen*
Estimating numbers of embryonic lethals in conifers

315 *C. S. Haley and S. A. Knott*
A simple regression method for mapping quantitative trait loci in line crosses using flanking markers

325 *M. R. Macnair, Q. J. Cumbes and A. A. Meharg*
The genetics of arsenate tolerance in Yorkshire fog, *Holcus lanatus* L.

336 *A. A. Meharg and M. R. Macnair*
Genetic correlation between arsenate tolerance and the rate of influx of arsenate and phosphate in *Holcus lanatus* L.

342 *A. J. Van Oeveren and P. Stam*
Comparative simulation studies on the effects of selection for quantitative traits in autogamous crops: early selection versus single seed descent

352 *B. K. Beniwal, I. M. Hastings, R. Thompson and W. G. Hill*
Estimation of changes in genetic parameters in selected lines of mice using REML with an animal model. 1. Lean mass

361 *B. K. Beniwal, I. M. Hastings, R. Thompson and W. G. Hill*
Estimation of changes in genetic parameters in selected lines of mice using REML with an animal model. 2. Body weight, body composition and litter size

372 *T. Robert, F. Lamy and A. Sarr*
Evolutionary role of gametophytic selection in the domestication of *Pennisetum typhoides* (pearl millet): a two-locus asymmetrical model

382 *P. Juchault, T. Rigaud and J-P. Mocquard*
Evolution of sex-determining mechanisms in a wild population of *Armadillidium vulgare* Latr. (Crustacea, Isopoda): competition between two feminizing parasitic sex factors

391 Books received

392 Book reviews

Number 5 November 1992

393 *Y. Carton, F. Frey and A. Nappi*
Genetic determinism of the cellular immune reaction in *Drosophila melanogaster*

400 *P. Casares, M. C. Carracedo, R. Piñeiro, E. San Miguel and L. Garcia-Florez*
Genetic basis for female receptivity in *Drosophila melanogaster*: a diallel study

406 *C. Benito, F. Romera, N. Díez and A. M. Figueiras*
Genic heterozygosity and fitness in rye populations with B chromosomes

412 *P. C. Colombo*
A new index for estimating genetic recombination from chiasma distribution data

416 *J. M. Braverman, B. Goñi and H. Allen Orr*
Loss of a paternal chromosome causes developmental anomalies among *Drosophila* hybrids

423 *M. Sari-Gorla, M. E. Pé, D. L. Mulcahy and E. Ottaviano*
Genetic dissection of pollen competitive ability in maize

431 *J. A. Irwin and R. J. Abbott*
Morphometric and isozyme evidence for the hybrid origin of a new tetraploid radiate groundsel in York, England

440 *B. C. Husband and S. C. H. Barrett*
Genetic drift and the maintenance of the style length polymorphism in tristylous populations of *Eichhornia paniculata* (Pontederiaceae)

450 *R. Lozano, C. Ruiz Rejón and M. Ruiz Rejón*
A comparative analysis of NORs in diploid and triploid salmonids: implications with respect to the diploidization process occurring in this fish group

458 *J. K. Hill and A. G. Gatehouse*
Genetic control of the pre-reproductive period in *Autographa gamma* (L.) (Silver Y moth) (Lepidoptera: Noctuidae)

465 *K. J. Chalmers, R. Waugh, J. I. Sprent, A. J. Simons and W. Powell*
Detection of genetic variation between and within populations of *Gliricidia sepium* and *G. maculata* using RAPD markers

473 *C. Bazin and J. Silber*
vestigial suppressor genes and resistance to aminopterin in *Drosophila melanogaster*

478 *E. V. Volpi, F. Pelliccia, V. Lanza, M. Di Castro and A. Rocchi*
Morphological differentiation of a sex chromosome and ribosomal genes in *Asellus aquaticus* (Crust. Isop.)

483 Books received

483 Book reviews

488 Announcement

Number 6 December 1992

489 *M. Santos, K. Fowler and L. Partridge*
On the use of tester stocks to predict the competitive ability of genotypes

496 *J. A. Hutchings and M. M. Ferguson*
The independence of enzyme heterozygosity and life-history traits in natural populations of *Salvelinus fontinalis* (brook trout)

503 *D. T. Bilton*
Genetic population structure of the Postglacial relict diving beetle *Hydroporus glabriusculus* Aubé (Coleoptera: Dytiscidae)

512 *D. J. Coates*
Genetic consequences of a bottleneck and spatial genetic structure in the triggerplant *Stylidium coroniforme* (Stylidiaceae)

521 *P. O'Donald and M. E. N. Majerus*
Non-random mating in *Adalia bipunctata* (the two-spot ladybird) III. New evidence of genetic preference

527 *S. R. Virdee and G. M. Hewitt*
Postzygotic isolation and Haldane's rule in a grasshopper

539 *S. Paumard-Rigal and M. Rosenberg-Bourgin*
Increase in the resistance to the *Bacillus thuringiensis* supernatant effect in a *Drosophila melanogaster* wild type Oregon R line

547 *W. Chapco, R. A. Kelln and D. A. McFadyen*
Intraspecific mitochondrial DNA variation in the migratory grasshopper, *Melanoplus sanguinipes*

558 *M. D. López-León, M. C. Pardo, J. Cabrero and J. P. M. Camacho*
Random mating and absence of sexual selection for B chromosomes in two natural populations of the grasshopper *Eyprepocnemis plorans*

562 *J. H. Willis*
Genetic analysis of inbreeding depression caused by chlorophyll-deficient lethals in *Mimulus guttatus*

573 *D. D. Shoemaker, J. T. Costa III and K. G. Ross*
Estimates of heterozygosity in two social insects using a large number of electrophoretic markers
